IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

TRANSMITTAL LETTER

Commissioner of Patents and Trademarks
Washington, D.C. 20231

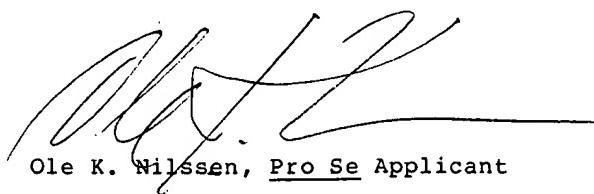

Enclosed is a patent application entitled:

ELECTRONIC BALLAST WITH CONTROLLED-MAGNITUDE OUTPUT VOLTAGE

which application consists of 28 pages of specification,
8 claims, and 7 sheets of drawings.

Also enclosed is an OATH, a Statement re Small Entity
Status, and a check (#4673) in the amount of \$355.00 to cover
the filing fee.

Applicant wishes to make it clear to Examiner that he has
numerous other patents issued and pending. Some of these might
be considered by Examiner as being material to the examination
of instant application. However, Applicant has thoroughly learned
that he can not rely on his own judgment with respect to what
an examiner might find to constitute materially relevant subject
matter. Therefore, Applicant requests of Examiner to identify
for himself which of Applicant's issued and/or pending patents
might contain subject matter that Examiner would deem to be
material to the examination of instant application.

Ole K. Nilssen, Pro Se Applicant
